MAC Programs

FTP Client:

To upload (put) and download (get) web files in your online FTP folder (the one we created in class) get a free copy of Fetch. You can fill out the form on the Fetch website to apply for an Educational license. Here's how to get it: follow the link below and scroll down to the section titled **Educational and Charitable Users** and follow the **Click Here** link to go to the **application form**, fill it out and they will email you with a Login name and Password for a free copy of the program, you then follow the link in the email to download a copy using the Login and Password they gave you.

Web Authoring Programs:

1) KompoZer

Here is a free, popular and easy to use HTML program for you if you do not own Dreamweaver. Although not as sophisticated, it has some features that are similar to Dreamweaver. It will get the job and it's free. In the right side column of the link below you can download the version you need based on your computer.

<http://www.kompozer.net/>

2) Textwrangler

If you are using a Mac and you want to use a text editor program designed for hand coders, download the free TextWrangler program. It's made by www.barebones.com and is the "little brother" or "little sister" of BBEdit which is an incredibly popular coding program,

BBEdit is not free. You can download TextWrangler by following the link below, it's at the top of the right side column under the title TextWrangler where it says Download FREE!

<http://www.barebones.com/products/textwrangler/>

Imagewell – Image Resizing Program:

The download is in the left side column under the picture of the Well where it says Download the Free ImageWell. We installed this program on the Macs in the Mac lab if you want to try it out before you download it.

Image Editing

The built in software that comes with a Mac (iPhoto) offers image editing functions if you do not have Photoshop.

PC Programs

FTP Client:

To upload (put) and download (get) web files in your online FTP folder (the one we created in class) get a free copy of Coffee Cup Free FTP version 3.

Web Authoring Programs:

1) KompoZer

Here is a free, popular and easy to use HTML program for you if you do not own Dreamweaver. Although not as sophisticated, it has some features that are similar to Dreamweaver. It will get the job and it's free. In the right side column of the link below you can download the version you need based on your computer.

<http://www.kompozer.net/>

2) HTML Kit

This is a free full-featured HTML editor, same idea as KompoZer but a little different.

Read the information under the title **Commonly Asked Questions:**

Q-1. What does the Personal License mean? & also the other sections on the page so you will understand what you are getting and why it's free.

<http://www.htmlkit.com/license/>

FastStone – Photo Resizer

FastStone offers free programs to work with your images.

FastStone Photo Resizer 2.4 may be handy to have to quickly resize your images for use on the web.
